->> Recommendations Based on Analysis

1. Risk-Based Interest Adjustment

Loans issued to customers with Grade B,C & D (especially sub-grades like B3, B5, C1, etc.) should be charged higher & medium interest rates or subjected to stricter terms, as these categories show a significantly higher default rate.

2. Stricter Loan Approval for Employment History

Customers with employment length of 1, 7, or 10 years means experts show a higher likelihood of default. Employment verification and job stability analysis should be prioritized during approval.

3. Defaulters Due for Specific Purposes

Applicants seeking loans for "debt consolidation" purposes should be evaluated more carefully, as these purposes are common among defaulters.

4. Home Ownership Analysis

Borrowers with "Rent", "Mortgage", home ownership types are more likely to default. "Mortgage" holders appear more reliable and can be treated as lower risk.

5. Verification Status Checks

Even borrowers with "Verified" or "Not Verified" status have high default rates. This indicates that verification alone is not sufficient, and other risk indicators should be considered.

->> Recommendations Based on Analysis

6. Term-wise Risk Adjustment

Loans with a 36-month term show a higher default rate. Consider applying more Strickly credit checks or insurance for these term loans.

7. Time-Based Lending Strategy for Defaulters

Most defaults occurred in 2011, particularly in the months of October,November and December.

8. Bankruptcy Is Not the Only Indicator

Most defaulters have “0 bankruptcies”, indicating that relying solely on bankruptcy history to judge credit risk is insufficient.

9. Debt to Income Ratio

Most defaulters have “”Medium debt ratio””, indicating that Normal dti ratio get higher defaulters.

10. Most Common Purpose That Find In Defaulters

Most defaulters Purpose is “”Debt-Consolidation””, indicating that Be Carefull Before Apply a loan for this Purpose.
